President's Message, Term 4 2018

I can't believe we are already up to Term 4 – where did this year go? The EKKA is now behind us, as is our very successful Winter School and we are now on the downhill run to Christmas. I know it sounds silly at present when we are still experiencing cold or very cool mornings, but I don't think it will be too long before we again start complaining about the heat.

We are nearly there! It won't be long now before we are completely out of disposable coffee cups and we can declare ourselves 'clean & green' – well, at least in that area anyway. It has taken quite a few months, but the acceptance of this new approach has been great. People are bringing in their own cups, we have had cups donated to us, and we are generally getting used to not throwing a cup in the bin after one use. I would venture to say U3A could be 'fully reusable' within the next two months, maybe even sooner. Well done everyone, you've done your bit on the 'War on Waste'.

Term 3 has again been very successful, with most classes showing as full or near full. Although this does cause some problems to those who can't access the class of their choice, please be assured we are doing everything possible to source new tutors and classes wherever we can. This will be an ongoing challenge as we expect member growth to continue unabated, with the 'Baby Boomers' of the late 40s and 50s now retiring in larger numbers. I would again suggest to those having difficulties joining a class to enrol immediately the Class Schedule becomes available as classes sometimes fill within days. As the saying goes, 'Book early to avoid disappointment'.

I have been giving a lot of thought lately to how lucky we are at U3A Brisbane with the diversity of members in our ranks. I would venture to say just about every profession or occupation is represented in our near 4000 strong membership. Just as a few examples: we have a self-published author with five books to his credit, including the history of U3A Brisbane 'Forever Learning'; doctors of all types, not just the medical variety; a published scientist who regularly gives presentations such as the recent science films shown in August during Science Week; an international editor and the list goes on. The Management Committee itself comprises teachers, an IT specialist, a vet, an accountant, a social worker, a retired academic and a marketing executive, all of whom add to the rich tapestry of talent available in our organisation. I doubt too many other seniors' organisations could boast such a line -up.

Welcome to Term 4, and we hope you enjoy your classes.

During the year we study Hilary Mantel's two Booker Prize winning novels: 'Wolf Hall' and 'Bring up the Bodies'. These two works of historical fiction are brilliantly written and, because they are also challenging for the reader, we go slowly. As well as appreciating the texts, we spend time on their social, political and religious contexts. For example, we touch on The War of the Roses, on Henry VIII's court and many other aspects of Tudor England. The events are seen through the eyes of Thomas Cromwell. In Term 4 we read the second half of 'Bring up the Bodies'.

H51 HISTORY - ENGLAND IN THE 15TH CENTURY

Maureen Lillie

Email: maureenlillie@gmail.com

This is a very interesting period bracketed by the huge population loss caused by the Black Death in the late 14th century and the discovery of the New World. There were changes to everyday life; the Wars of the Roses changed the ruling dynasty in England and new technology allowed ideas on science and religion to spread. Recent finds are causing a re-examination of the century and our ideas about it, but there are persistent myths. What was it like to live in those times?

Many cultures have historically attached special significance to Sirius, the brightest star in the night sky. Our Julian calendar is based on the Ancient Egyptian knowledge of the heliacal rising of the star Sirius with our Sun which is also a star. Historically, when the dominant geocentric belief was challenged by the radical scientific heliocentric model of Copernicus, Galileo and Bruno, they were persecuted. This PP presentation is an illustrated journey of discovery expanding IDEAS about our Cosmic connections, encompassing the earth, the stars, ancient and modern cultures, religions, philosophies, science and politics.

We will finish Bk. 8 of Ovid's Metamorphoses (Ovid is probably the cleverest of the Roman poets, certainly the funniest). We may then consider Lucretius' de Natura Rerum, the only surviving work of modern scientific thinking to come from ancient times (it covers atomic theory). Thereafter we may read another book (Bk. 2?) of Vergil's Aeneid.

The class teaches you how to use a Windows video editor program to assemble and edit video clips, mix them with still photos, add some music and voice commentary, and edit with any relevant special effects (like zoom, marching text sub-titles or sepia image toning from the large variety of choices the program supplies) to produce a movie output. We learn by doing. Make a short movie each term, either as a joint project with other pupils, or a project

of your own choosing. Includes: choose a project, research the topic, write a story-line, camera and shooting tips, edit your project by computer and burn to DVD. Starts 24/10/18

E28 SOCIAL JUSTICE & AUSTRALIAN SOCIETY

Ongoing

Lawrence di Bartolo

Email: ldibartolo3@gmail.com

We have heard the term 'fairness' used quite often by our political leaders and others in positions of power. But what does this term mean? Does it mean equal opportunity for all? Should it mean more than this if Australia is to be the egalitarian society it claims to be? We will consider the meaning of social justice and its contested nature. We will then proceed to look at aspects of Australian society - for example, inequality, gender, race, sexuality and ageism to help determine how fair/socially just Australian society really is. There will be a \$5 cost per term for photocopying.
